

Project Navigation Guide

Vous êtes ici avec un projet DevOps complet. Voici comment naviguer!

Where to Start? (Commencer Par Où?)

Je suis un DÉBUTANT - Où commencer?

1. [README.md](#) ← START HERE!

- Vue d'ensemble du projet (5-10 min)
- Architecture globale
- Quick start

2. [PROJECT_COMPLETION_SUMMARY.md](#)

- Voir ce qui a été créé (10 min)
- Statistiques du projet
- Next steps

3. [IMPLEMENTATION_GUIDE.md](#)

- Guide étape par étape détaillé (30 min)
- Screenshots et explications
- Troubleshooting

4. [SECRETS_SETUP.md](#)

- Configuration des secrets GitHub (10 min)
- Comment obtenir les credentials AWS
- Vérification

5. **Déployer!**

- Pousser code vers GitHub
 - Regarder le pipeline s'exécuter
 - Accéder à l'application
-

Je suis un DÉVELOPPEUR - Je veux les détails

1. [ACTION_PLAN.md](#)

- Architecture détaillée
- Phases d'implémentation
- Timeline

2. [QUICK_REFERENCE.md](#)

- Tous les commands

- Troubleshooting rapide
- Pro tips

3. Fichiers de code:

- `terraform/main.tf` - Infrastructure AWS
- `ansible/deploy.yml` - Configuration
- `app/app.js` - Application Node.js
- `.github/workflows/pipeline.yml` - CI/CD

Je veux JUSTE DEPLOYER

1. Lire: [SECRETS_SETUP.md](#) (5 min)
2. Configurer secrets GitHub (5 min)
3. `git push origin main`
4. Aller à GitHub → Actions
5.  Prendre un café (pipeline s'exécute)
6. Ouvrir votre app (30-35 min après)

Complete File Guide

Documentation (À Lire)

Fichier	Durée	Objectif
README.md	5 min	Vue d'ensemble & architecture
IMPLEMENTATION_GUIDE.md	30 min	Guide complet étape par étape
ACTION_PLAN.md	15 min	Plan détaillé et phases
SECRETS_SETUP.md	10 min	Configuration secrets GitHub
QUICK_REFERENCE.md	5 min	Commands et troubleshooting
PROJECT_COMPLETION_SUMMARY.md	10 min	Ce qui a été créé

Infrastructure (Terraform)

Fichier	Fonction
<code>terraform/main.tf</code>	VPC, EC2, ALB, Security Groups
<code>terraform/variables.tf</code>	Configuration variables
<code>terraform/outputs.tf</code>	ALB DNS, Instance IPs
<code>terraform/user_data.sh</code>	EC2 initialization

Configuration (Ansible)

Fichier	Fonction
<code>ansible/deploy.yml</code>	Main playbook
<code>ansible/inventory.ini</code>	Server inventory
<code>ansible/templates/docker-compose.yml.j2</code>	Compose template
<code>ansible/templates/nginx.conf.j2</code>	Nginx config

Application (Docker)

Fichier	Fonction
<code>app/app.js</code>	Node.js Express API
<code>app/package.json</code>	npm dependencies
<code>Dockerfile</code>	Docker image definition
<code>docker-compose.yml</code>	Local development

CI/CD (GitHub Actions)

Fichier	Fonction
<code>.github/workflows/pipeline.yml</code>	Full automation pipeline

Configuration

Fichier	Fonction
<code>.gitignore</code>	Git ignore rules
<code>.aws-config</code>	AWS CLI config

Reading Path by Role

Student / Learner

1. README.md (Overview)
↓
2. IMPLEMENTATION_GUIDE.md (How-to)
↓
3. PROJECT_COMPLETION_SUMMARY.md (What's included)
↓
4. QUICK_REFERENCE.md (Commands)
↓
5. Read the actual code files

Project Manager

1. README.md (Overview)
↓
2. ACTION_PLAN.md (Timeline)
↓
3. PROJECT_COMPLETION_SUMMARY.md (Stats)

DevOps Engineer

1. ACTION_PLAN.md (Architecture)
↓
2. terraform/main.tf (Code)
↓
3. ansible/deploy.yml (Config)
↓
4. .github/workflows/pipeline.yml (CI/CD)
↓
5. QUICK_REFERENCE.md (Commands)

Deploy ASAP User

1. SECRETS_SETUP.md (5 min)
↓
2. Configure secrets (5 min)
↓
3. git push origin main (1 min)
↓
4. Watch pipeline (30 min)
↓
5. Done! Access app

Finding What You Need

"How do I deploy?"

→ [IMPLEMENTATION_GUIDE.md](#) - STEP 7 & 8

"What resources are created?"

→ [PROJECT_COMPLETION_SUMMARY.md](#)

"How do I configure secrets?"

→ [SECRETS_SETUP.md](#)

"What commands do I need?"

→ [QUICK_REFERENCE.md](#)

"What's the full timeline?"

→ [ACTION_PLAN.md](#)

"How does Terraform work?"

→ [terraform/main.tf](#) + [README.md](#) Architecture section

"How does Ansible work?"

→ [ansible/deploy.yml](#) + [README.md](#) Architecture section

"How does GitHub Actions work?"

→ [.github/workflows/pipeline.yml](#) + [README.md](#) Pipeline section

"Something broke, how do I fix it?"

→ [QUICK_REFERENCE.md](#) Troubleshooting section

"What does each file do?"

→ [PROJECT_COMPLETION_SUMMARY.md](#) Directory Structure

Documentation Map

```
START HERE
  ↓
[README.md]
(Overview + Architecture)
  ↓
  ├── Need hands-on guide? → [IMPLEMENTATION_GUIDE.md]
  ├── Need exact timeline? → [ACTION_PLAN.md]
  ├── Need to setup secrets? → [SECRETS_SETUP.md]
  ├── Need commands? → [QUICK_REFERENCE.md]
  └── Need what's created? → [PROJECT_COMPLETION_SUMMARY.md]

  ↓
READY TO DEPLOY?
  ↓
[IMPLEMENTATION_GUIDE.md] STEP 7-8
  ↓
git push origin main
  ↓
GitHub → Actions
  ↓
🕒 Wait 30-35 minutes
```

↓
Application Live!

File Sizes & Purpose

Fichier	Size	Purpose
README.md	~10KB	Overview
IMPLEMENTATION_GUIDE.md	~20KB	Detailed walkthrough
ACTION_PLAN.md	~15KB	Complete plan
QUICK_REFERENCE.md	~12KB	Commands & tips
SECRETS_SETUP.md	~8KB	Secrets guide
PROJECT_COMPLETION_SUMMARY.md	~12KB	Summary
terraform/main.tf	~15KB	Infrastructure
ansible/deploy.yml	~6KB	Configuration
.github/workflows/pipeline.yml	~8KB	CI/CD

Total Documentation: ~6 files, ~95KB **Total Code:** 12+ files, ~50KB

What You'll Learn

Reading Documentation

-  DevOps concepts and best practices
-  Cloud architecture design
-  CI/CD pipeline design
-  Infrastructure automation
-  Configuration management

Reading Code

-  Terraform HCL syntax
-  Ansible YAML playbooks
-  Docker containerization
-  GitHub Actions workflow
-  Node.js Express API

Hands-On

-  AWS infrastructure deployment
-  Server configuration
-  Container orchestration

-  Pipeline automation
 -  Troubleshooting
-

Quick Navigation Links

Essential Documents

-  [README.md](#) - Start here
-  [IMPLEMENTATION_GUIDE.md](#) - How-to guide
-  [SECRETS_SETUP.md](#) - Setup secrets
-  [QUICK_REFERENCE.md](#) - Commands

Planning & Analysis

-  [ACTION_PLAN.md](#) - Full plan
-  [PROJECT_COMPLETION_SUMMARY.md](#) - What's created

Code Files

-  [terraform/main.tf](#) - Infrastructure
 -  [ansible/deploy.yml](#) - Configuration
 -  [.github/workflows/pipeline.yml](#) - CI/CD
 -  [app/app.js](#) - Application
-

TL;DR (Too Long; Didn't Read)

Just want to deploy?

1. Read [SECRETS_SETUP.md](#) (5 min)
 2. Add secrets to GitHub (5 min)
 3. `git push origin main`
 4. Coffee break ☕ (30 min)
 5. Your app is live! 🎉
-

Help Index

"I don't know where to start"

→ Read [README.md](#), then this file

"I want the complete walkthrough"

→ Read [IMPLEMENTATION_GUIDE.md](#)

"I need to understand the plan"

→ Read [ACTION_PLAN.md](#)

"Something's broken"

→ Check [QUICK_REFERENCE.md](#) Troubleshooting

"I need specific commands"

→ Check [QUICK_REFERENCE.md](#) Commands section

"I want to know what's inside"

→ Read [PROJECT_COMPLETION_SUMMARY.md](#)

"I need to configure GitHub secrets"

→ Read [SECRETS_SETUP.md](#)

"I want to learn the details"

→ Read the code files directly

Recommended Reading Order (By Time)

5-Minute Tour

1. [README.md](#) - Overview

15-Minute Tour

1. [README.md](#)
2. [PROJECT_COMPLETION_SUMMARY.md](#)

30-Minute Tour

1. [README.md](#)
2. [PROJECT_COMPLETION_SUMMARY.md](#)
3. [ACTION_PLAN.md](#)

Complete Understanding (2+ hours)

1. All documentation files
 2. All code files
 3. Review AWS/Terraform/Ansible docs
 4. Deploy and learn hands-on
-

Pro Tips

-  Bookmark [QUICK_REFERENCE.md](#) for quick lookups
-  Keep [SECRETS_SETUP.md](#) open during configuration
-  Reference [IMPLEMENTATION_GUIDE.md](#) during deployment
-  Check [ACTION_PLAN.md](#) if anything fails

Happy Learning! 🚀

Choose your starting document above and begin your DevOps journey!
